## PROFILE

Undergraduate Software Engineering student at IJSE with experience in web development and a growing interest in Data Science and Machine Learning. Currently learning Python and DS/ML basics. A curious and dedicated learner with strong problem-solving skills, eager to gain hands-on experience through an internship on real-world projects.

## PROJECTS

### KEEPIFY - The Products warranty Tracker

Many People forget their products warranty details. To address this I created a MERN stack application that allow user to store warranties and receive reminders before the expiration

#### Technologies

- Frontend: React, TypeScript, Redux Toolkit
- Backend: Node.js, Express.js
- Database: MongoDB
- Security: JWT Authentication, Refresh Tokens
- Version Control: GitHub

### NEEDITDONE - Job Posting Platform

Finding reliable workers for house hold jobs like plumbing , carpenter are challenging nowadays, To address this I created a spring boot application to brigde the gap between house owners and workers .

#### Technologies

- Backend: Spring Boot, Spring Security, JWT, Hibernate
- Frontend: HTML, CSS, Bootstrap, jQuery
- Database: MySQL
- Version Control: GitHub
